WEIGHTED ANIMALS BY MANIMO

Cuddly and adorable, manimo animals are there for children both in times of stress and when relaxing. Their weight soothes, comforts and helps the child better understand where their body is in space (spatial awareness). A manimo's heaviness causes the

same sensation as deep touch pressure.

Manimos are available in several colors. They weigh between 2.2 lbs. and 5.5 lbs. and are for children ages three and up. Due to the weight of the animals, we recommend using them for 15-20-minute periods. If used longer, the body will grow accustomed to the sensation, which will reduce the beneficial effects over time.

TOOLS FOR THE EARS AND EYES

Products found in this section offer the sensory system different types of input. Light filters and Earmuffs help to dampen the sensory input coming from the environment; helping to calm and organize the sensory systems. Other tools provide additional visual or auditory feedback to the sensory systems, helping to 'wake up' a sluggish sensory system and increasing the chance that the visual or auditory cue is noticed.

sensory stories

Sensory Stories are a method to allow children with sensory modulation issues to cope with everyday experiences. They are in a format that allows children to employ calming strategies throughout the course of specific daily activities like combing hair, going to the dentist and many common school activities. When read on a regular basis, Sensory Stories enable children to engage in life.

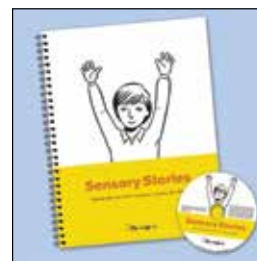

SENSORY STORIES: STRATEGY CARD DECKS

TAKE FIVE! STAYING ALERT AT HOME & SCHOOL

Sensorimotor activities and other strategies are presented in an easy-to-read fashion to support children's engines to "run just right" at home and school. Teachers and parents love the practical ideas to help children "take five". In addition to learning ideas for quick movement breaks, adults will expand their repertoire of self-regulation strategies to sustain students' levels of alertness. 86 pgs.

PP11703 *Take Five!* **\$30.00**

The Alert Program consists of a series of lessons and activities, that when incorporated with sensory processing techniques, has proven to be highly effective. The program has been adapted successfully for preschool through high school students and for adults.

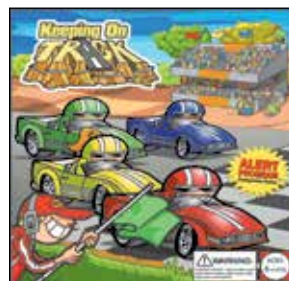

TEST DRIVE: INTRODUCING THE ALERT PROGRAM THROUGH SONG

This book and CD, with its appealing songs to support children's self-regulation, is full of practical ideas and suggestions. Test Drive is the simplest way to introduce the Alert Program concepts to children in schools, homes, or therapy settings. The Test

Drive book walks you through exactly how to introduce the Alert Program analogy and vocabulary to a group of students at school or to an individual at home.

publications from carol kranowitz

As a music, movement, and drama teacher for 25 years, **Carol Kranowitz, M. A.**, observed many out-of-sync preschoolers. To help them become more competent in their work and play, she began to study sensory processing and sensory integration ("SI") theory. She learned to help identify her young students' needs and to steer them into early intervention. She is best-known for her book *The Out-of-Sync Child*.

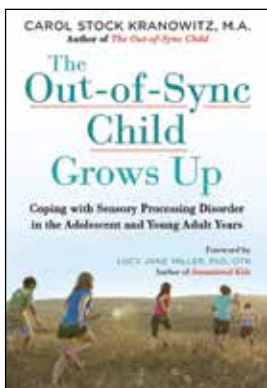

THE OUT-OF-SYNC CHILD: 3RD EDITION

The groundbreaking book that explains Sensory Processing Differences (SPD)--and presents a drug-free approach that offers hope for parents--now in a newly updated third edition (2022). This revised edition includes expanded information about SPD "look-alikes," including Learning Disabilities, ADHD, and autism; about diagnosis and treatments; and about other topics.

STARTING SENSORY THERAPY: FUN ACTIVITIES FOR THE HOME AND SCHOOL!

Starting Sensory Therapy offers 100+ activities and games for children with Sensory Processing Disorders (SPDs). Parent of a son with SPD, author Bonnie Arnwine chose activities that require minimal time, money, and clean-up. Kids have fun while activities exercise the seven sensory “muscles”: the visual, auditory, tactile, olfactory, oral, vestibular, and proprioceptive senses. Activities can be enjoyed with others, so children also benefit from interacting socially with their peers, parents, and teachers.

THE POLYVAGAL PATH TO JOYFUL LEARNING: TRANSFORMING CLASSROOMS ONE NERVOUS SYSTEM AT A TIME

Every student and teacher is different, but there’s one thing each has in common: a responsive nervous system ready for action. Whether it’s a fight breaking out on the playground, a difficult conversation with a parent, or an impromptu fire drill, understanding how the nervous system responds can help keep teachers and students on an even keel.

Polyvagal Theory (PVT) has had a tremendous impact on the mental health field, shedding light on how the nervous system predictably moves between different states in response to changing situations. School consultant Debra Em Wilson introduces PVT to educators and shows how using PVT-guided strategies can help create optimal learning environments. When school staff understand the role of the nervous system in learning, they can better help students develop the skills leading to increased resilience, adaptability, and flexibility: essential qualities for social, emotional, and academic success. 176 pp.
