• [Previewing Assessments 2014-2015](#)

Assessments offer objective evidence of the level of performance in the area being tested. Thus, assessments are among the most important tools used by therapists. Not only are assessments useful in identifying problem areas, they are needed to design and evaluate the treatment plan.

We are very excited that Therapro's 5th Annual Assessments Catalog goes to press this week. So what's new? First, we have expanded the Autism category. Our newest assessments evaluate [Social Responsiveness](#) and [Communication](#), [Emotional Regulation](#), [Cognitive Abilities](#) and [Transition Planning](#), specific to individuals with autism. The [Academic Skills Category](#) has been expanded to include tests of Spelling, Reading and overall [Academic Achievement](#). More and more of the assessments we offer now include [Scoring and Reporting Software](#) to make your work easier.

In the Therapro catalog assessments are arranged in twelve different evaluation areas from Autism to Sensory Processing then categorized in terms of the age ranges for which they are designed. This is summarized in the [Therapro Handy Evaluation Chart](#), a useful reference which allows the examiner (reader) to scan the columns using the age of the person to be evaluated, and find the appropriate evaluation.

Therapro remains dedicated to offering a complete set of assessment tools for professional therapists.

Specials

10% off on the following products:

1. [Sensory Story Strategy Cards](#)
2. [Fidget Kit](#)
3. [Letter Treasure Hunt](#)
4. [I Can Work!](#)
5. [Sensory Connection Program \(Set only\)](#)
6. [Fine Motor Olympics \(Set only\)](#)

Featured Products

[Beery-Buktenica Developmental Test of Visual-Motor Integration, 6th Edition \(BEERY VMI\)](#)

This highly acclaimed test measures visual-motor integration in children and adults. Offers a convenient and economical way to screen for visual-motor deficits.

[Allen Cognitive Level Screen-5](#)

The Allen Cognitive Level Screen is intended to provide a quick measure of learning potential, global cognitive processing capacities and performance abilities.

[Sensory Processing Measure \(SPM\)](#)

This unique assessment is the first to show how sensory processing problems manifest in various settings.

[Developmental Test of Visual Perception - Third Edition \(DTVP-3\)](#)

The DTVP-3 is the most recent revision of Marianne Frostig's popular Developmental Test of Visual Perception.

Karen Conrad Weihrauch, PhD, OTR/L
President, Therapro

• Therapro's *Here's How I Write* in AJOT

The April/May Issue of the American Journal of Occupational Therapy (AJOT) featured a research article by Sharon A. Cermak and Julie Bissell, *Content and Construct Validity of [Here's How I Write \(HHIW\): A Child's Self-Assessment and Goal Setting Tool](#)*.

[Click here](#) to read a summary of the article. The article in its entirety is available to AJOT subscribers.

• June Sale Bin

Please view our [Sale Bin](#) for all of our June specials. These are first quality products that are either overstocked or discontinued. Please look frequently, as we update this often.
